AIMS-20 — Airspace Data Repository

The purpose of the ADR is to provide a common and consistent source of airspace information, containing both static and dynamic elements, as part of NIMS, which will support the ASM/ATFCM/ATC collaborative working process. The ADR will be a collaborative distributed environment with interfaces between the European Aeronautical Database (EAD), the Network Manager Central Airspace & capacity database (CACD) and the National/local systems.

Category	SYSTEM		
Stakeholder	**Network Manager**		
V3 End	-		
V4 Start	-	**V4 End**	-
V5 Start	-	**V5 End**	31-12-2010 **Network Manager: 31-12-2010**
