

# AIMS-23 — Enhanced digital data chain to ensure Aeronautical Information data provision to meet full 4D trajectory management requirements

*Enhanced aeronautical information data provision chain enabling the provision of high quality aeronautical information, originated as efficient as possible, to support full 4D trajectory management. To meet these requirements the aeronautical information will be provided as dynamically as possible and existing processes around updating aeronautical information (AIRAC-cycle) will be revised to meet the used needs.*
