

AERODROME-ATC-06a — Alternative aerodrome surveillance incorporating the function that detects Conflicting ATC Clearances (CATC) for runway operations

The Alternative Aerodrome Surveillance Safety Support Service incorporates the function for the detection of Conflicting ATC Clearances (CATC). This additional function is provided to support runway operations. The detection of CATC is based on clearances and instructions which are input by the ATCOs, and the position of mobiles from the Alternative Aerodrome Surveillance Service.
