

AIRPORT-40b — Enhanced Airport Performance Monitoring System (Airside/Lanside dashboard)

A system supporting performance monitoring through key indicators, resource availability and utilisation related to all airside and landside airport processes (passenger process including Passenger with Reduce Mobility [PRM] and transfer passengers as well as baggage process) airport processes. This includes the ability to steer performance targets by setting agreed thresholds for automatic monitoring and alerting. The main purpose is to ensure the necessary full predictability of airport operations.
