

AIRPORT-07 — Decision support processes/tools for airport operations management

Airport computer-based tools (simulation models, and/or techniques and methods) developed to support decision analysis and common decision making in an Airport Operations Centre (APOC) . This enabler is intended to help decision makers to use any information, knowledge, and/or business models to identify and solve problems and make decisions, in particular by predicting the impact of different options on next future operations (what if).
