

CTE-C03d — Commercial mobile/cellular telecommunications to support non-safety services for General Aviation

Support for general aviation (GA) for non safety services: Use of commercial mobile communications to enhance information for GA pilots to increase safety particularly in mixed traffic environments. This includes the potential use of an appropriate infrastructure (3G/4G/5G) as well as the bundling and provision of additional services (FIS [Weather/NOTAM/etc.] and TIS) to GA.
