

# CM-0303 — Sector Team Operations Adapted to New Responsibilities in En-route, 1 Planning to several Tactical Controllers team structure

*New operating procedures are in place such that the Planning Controller provides support to several Tactical Controllers operating in different sectors; traditional inter-sector coordination procedures are maintained. In this configuration, the Planning Controller ensures suitable coordination agreements between sectors and assists in managing the workload of the Tactical Controllers, thus ensuring that potentially critical traffic situations and the associated workload are manageable for the Tactical Controllers at the time of occurrence.*

**Rationale** New opportunities for the utilisation of operational staff are offered along with the increasing sophistication of ATC support tools. This will provide improvement in cost effectiveness.
