

AUO-0201 — Enhanced Flight Plan Filing Facilitation

Airspace users are assisted in filing their flight plans and in re-rerouting according to the airspace availability and ATFM situation, through collaboration with CFMU, ANS providers and airports. Airspace users can make more informed decisions when compromises are needed between delay, re-routing, trajectory limitations or costs. On the basis of the offered routings, they can select the offered routing which is best suited to their company policy for optimising flight time, fuel burn or other parameters.

Rationale Today, finding a valid route in the increasingly complex European airspace has become such a challenge that aircraft operators usually have visibility of several solutions only if they have access to sophisticated tools.

Forecast V3 end date -

Benefits start date (IOC) 31-12-2011

Full benefits date (FOC) 31-12-2015
