

## AUO-0204-C — Agreed Reference Business and Mission Trajectories

*The Reference Business/Mission Trajectory is the result of the collaborative planning process that revises the Shared Business/Mission Trajectory (SBT/SMT) and is published as the Reference Business/Mission Trajectory (RBT/RMT). Information exchanged will be enriched to support performance based operations Information such as the preferred user trajectories or performance impact of ATM measures on affected traffic will be shared and updated dynamically to monitor in real-time ATM processes performances. Business trajectory management will also evolve to enable the introduction of advanced airspace structures (and associated management processes).*

**Rationale** Objective is to ensure better planning and traffic ordering, and then, the optimisation of the network usage, thanks to better collaboration and sharing of up to date data between actors.
