

# AOM-0202 — Enhanced Real-time Civil-Military Coordination of Airspace Utilisation

Real-time coordination is further enhanced through 'what-if' functionalities and automated support to airspace booking and airspace management (e.g. integrated toolset allowing AMC and other parties to design, allocate, open and close military airspace structures on the day of operations).

**Rationale** Progress has been made in the recent years to facilitate exchanges between civil and military units through the deployment of a civil-military ATM-air defence coordination tool (integrated civil and military air information picture). However, civil-military interoperability is to be increased especially to cater for the requirements for more dynamic use of airspace. Furthermore, air defence and security concerns remain high, implying the continued need for efficient detection of renegade targets.

**Forecast V3 end date** -

**Benefits start date (IOC)** 31-12-2019

**Full benefits date (FOC)** 31-12-2023

**Current Maturity Level** -

**Solution Data Quality Index** -

**Current Maturity Phase** R&D Finalised

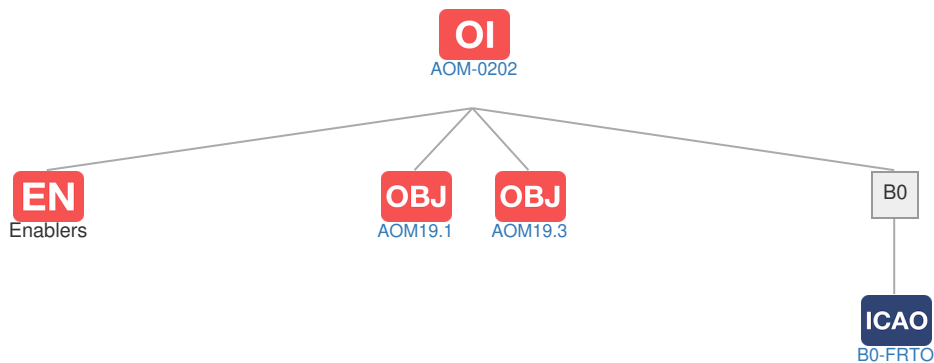

**Scope** Network

**Release** -

**PCP Status** -
