

IS-0204 — Facilitated Aeronautical Data Exchanges through Digitalised/Electronic Information

The provision of aeronautical information is supported by electronic publication (eAIP). Updates to the aeronautical information are disseminated in electronic/digital form.

Rationale The traditional product centric provision of aeronautical information has to be replaced by a data centric and systems oriented solution in which any required ATM data will be available permanently. Data models (AIXM), electronic AIP, EAD are the foundation towards global adoption of common and consistent data exchange models covering all aspects of AIM.

Forecast V3 end date -

Benefits start date (IOC) 31-12-2024

Full benefits date (FOC) 31-12-2030
