

CM-0702 — Ad Hoc Delegation of Separation to Flight Deck - Crossing and Passing (C&P)

The Crossing and Passing applications (incl. Lateral crossing and passing; Vertical crossing and passing) allow an aircraft to cross or pass a 'target' aircraft using ASAS ASEP. E.2.6.2.3.3

Rationale Controllers are able, under defined conditions, to delegate the responsibility for specific separation tasks to the flight deck of suitably-equipped aircraft. Such delegations will be part of the clearance resulting from mutual agreement between controllers and pilots. It is cooperative separation. The benefits will be to discharge the controller, by delegation of tasks to the flight crew and to minimise the impact of conflict resolution on trajectory.
