

POI-0004-SDM — Optimisation of Controller Working Position environment supported by geographically seperated enviroment.

The virtual aspects are a key driver of the use of future ATM systems. Using the CWP virtualisation technology is one possibility for virtual environments HMI to improve the cost-efficiency and to optimise the controller enviroment.

Rationale The virtual aspects are a key driver of the use of future ATM systems. Using the CWP virtualisation technology is one possibility for virtual environments HMI to improve the cost-efficiency and to optimise the controller enviroment.

Forecast V3 end date 31-12-2022

Benefits start date (IOC) 31-12-2029

Full benefits date (FOC) 31-12-2033
