

POI-0008-MET — Provision of MET data as SWIM services (Yellow Profile) relevant for Aerodrome and TMA

Dedicated MET information (observations, nowcasts and forecasts) will be provided by MET systems as SWIM services. Dedicated and specialized information services are provided as required by operational context. As MET systems belong to enabling solutions, the delivered MET information will enable ATM systems for Airport and TMA operations to achieve their operational improvements.

Rationale This POI is meant to serve as a system engineering artifact in DS18 that links to operational OIs and METEO-Enablers. However, for DS19 differentiation into specific and more concrete POIs is proposed. The meaning of specific is here that the POI shall link to only one operational context and METEO enablers needed only to mature this.

Forecast V3 end date 31-12-2019

Benefits start date (IOC) 31-10-2029
