

# CM-0310 — Sector Team Operations Adapted to Collaborative Operating Procedures involving reduced tactical co-ordination in En-Route

*New operating procedures are in place such that the traditional requirement to agree co-ordination conditions for all traffic at sector boundaries prior to the transfer of control is removed. Initial transfer criteria will be set in order to provide a default plan, however Controllers are able to operate collaboratively, having access to the planned and cleared profiles of flights for which they are not expected to be responsible, and may issue clearances without prior co-ordination or release outside that default plan should the environmental traffic allow, utilizing other sectors, airspace as necessary, and undertaking, unilaterally, to assure appropriate separation in order to achieve the flight's desired profile and allowing the airspace to be used more freely and efficiently with significantly lower workload.*

**Rationale** New opportunities for the utilisation of operational staff - including new roles for the Tactical and Planning Controllers within the team - are offered along with the increasing sophistication of ATC support Tools. This will continue to provide improvements in cost effectiveness and will result in better profiles for aircraft resulting in greater fuel efficiency and predictability.

**Forecast V3 end date** 31-12-2020

**Benefits start date (IOC)** 31-12-2027

**Full benefits date (FOC)** 31-12-2031

**Current Maturity Level** V2

**Solution Data Quality Index** -

**Current Maturity Phase** R&D

**Scope** -

**Release** -

**PCP Status** -
