

SDM-0217 — Delegation and/or contingency of airspace.

The delegation and/or contingency of airspace allows to delegate the airspaces between ATSUs thanks to a Virtual Centre environment.

Delegation will be possible both in case of predefined events (triggered by traffic and organization specific needs) or in case of a contingency caused by an unexpected event.

A seamless ATS service provision in the delegated airspace will be guaranteed as well as the air navigation service quality and safety.

Rationale The possibility to delegate the airspace under certain traffic conditions can allow cost optimization and load balancing.
Furthermore the higher availability of potential ATCOs in different ATSUs will increase the global capacity for peaks period.
