

AO-0821 — Post-Operations Analysis support solutions and reporting capabilities

Linked to the decision support suite, the Post Operations Analysis Suite (POAS) uses a coherent set of support tools for the timely analysis of specific events and automated post operations standardized reporting to support a continuous airport learning environment. This analysis will highlight opportunities for further improvements. Quality enhancements from local to European level will be identified through this analysis over all stakeholders, bringing expected benefits in Predictability, Flexibility, Efficiency and Capacity.

Rationale STEP1 addressed Post-Operations analysis in terms of a continuous learning process, however there is a need for support solutions for the standardization and automation of post-operations analysis activities.

Forecast V3 end date 31-12-2020

Benefits start date (IOC) 31-12-2026

Full benefits date (FOC) 31-12-2030
