AeronauticalInformationFeature	The service to supply aeronautical features on request in compliance with the WFS standards.	
AeronauticalInformationMap	An AeronauticalInformationService providing maps upon request. Following ISO "IS 19128:2005...	
AeronauticalInformationNotification	Alert users when new aeronautical information is available; provide dynamic data updates to...	
AirportFlightInformationPublication	Airport Flight Information Publication service is part of a series of services that help automate...	
AirportFlightPlanningInformation	The AirportFlightPlanningInformation service supports the AOP-NOP integration concept by...	
AirportMETAlert	Service providing alerts and warnings to airport stakeholders when MET parameters exceed a...	
AirportMETForecast	A service providing MET parameters forecasted at the airport.	
AirportMETInducedCapacityReduction	Service to provide the capacity of an airport reduced as a result of meteorological factors.	
AirportMETNowcast	Service to provide a now cast for an airport.	
AirportMETObservation	A service providing MET parameters observed at the airport.	
ARESActivation	Logical service model for the Activation of one ARES.	
ARESDeactivation	Logical service model for the Deactivation of one ARES.	
ARESPreActivation	Logical service model for the Pre activation of one ARES.	
ARESQuery	The ARESQuery service provides the mean for the WOC, AMC,... to retrieve an ARES using the...	
ARESRelease	Logical service model for the release of one ARES.	
ArrivalManagementInformation	Arrival Managers produce Arrival Information for Flights and Arrival Sequences to be used either...	
ArrivalSeparationIndicator	ArrivalSeparationIndicator service	
ATCFlightObjectControl	The ATC Flight Object Control service allows consumers to request a number of changes to a Flight...	
CalculatedPreDepartureSequenceDelivery	The Calculated Pre-Departure Sequence Delivery service delivers the TSAT or/and TTOT A-CDM time...	
DeparturePlanningInformation	Arrival Management needs to consume departure planning information from Satellite Airports. It...	
ExtendedFlightPlanSubmission	The Submission service supports the Airspace User to: - request the validation of an Extended...	
FlightPlanDataDistribution	The FlightPlanDataDistribution Service supports the service provider (Network Manager) to: - send...	
HotspotManagementService	The Hotspot Management service supports the Short-Term ATFCM Measures (STAM) concept by providing...	
IntegratedDigitalBriefing	The IntegratedDigitalBriefing service allows consumers to request digital AIS and MET data for...	
M-CDMMeasureService	The MCDM - Measure Collaborative Decision Making - service manages and promotes the collaboration...	
METAR	A service providing the METAR bulletin according to ICAO Annex 3 requirements	
METGriddedForecast	This service will be provided by the METSP (MET Service Provider). The METSP is an organisation...	
METHazardEnrouteForecast	Service handling Nowcast (D -2hours, 3D, Probability factor) and Forecast(d-2 hours to 7days, 3D,...	
METHazardEnrouteObservation	Service handling actual significant weather phenomena for immediate assessment by consumers.	
METREPORT	A service providing the ICAO local routine (METREPORT) or the local special (SPECIAL) reports...	
NetworkOperationPlan	The NetworkOperationPlan Service synchronizes the Network Operations Plan with the Airport...	
NMCapacityDataService	The NMCapacityData service enables the retrieval and update methods for Airspace capacities.	
NMFlightDataService	The NMFlightData service is used to query and retrieve information on existing flight plans and...	
OATFlightDataDistribution	Service to provide the interfaces for the distribution of OAT Flight Data from NM to the...	
OATFlightPlanSubmission	The OAT Flight Plan Submission service supports the State user (usually the WOC), in enabling...	
PreDepartureSequenceSetting	Pre-Departure Sequence Setting service is part of a series of services that help automate the...	
ReportAircraftETAMinMax	The service package models the provision of the aircraft flight management system Estimated Time...	
ReportAircraftTrajectory	The ReportAircraftTrajectoryService provides the 4D trajectory as known by the aircraft Flight...	
RunwayManagementInformation	Service delivers planning information about runway configuration, runway capacities and...	
RunwayMixSequence	The runway mix sequence service is in charge of published the runway mix sequence generated by...	
SharedFlightObject	This package contains the service to handle the maintain copies of the shared Flight Object...	
SNOWTAM	Service providing the SNOWTAM bulletin in compliance with ICAO Annex 15.	
STAMMeasuresService	The STAMMeasures service supports the Short-Term ATFCM Measures (STAM) concept by providing the...	
TAF	A service providing the TAF bulletin according to ICAO Annex 3 requirements	
TargetOffBlockTimeSetting	Target Off-Block Time Setting service is part of a series of services that help automate the...	
TrafficVolumeInformationService	The TrafficVolumeInformation service is used for monitoring the amount of air traffic over a...
