

Solution PJ.07-03 — Mission Trajectory Driven Processes

Mission Trajectory Driven Processes refer, through a full integration of the WOC within the ATM system, to the updating of wing operations centre (WOC) processes for the management of the shared and reference mission trajectory (SMT/RMT). These processes respond to the need to accommodate individual military airspace user needs and priorities without compromising optimum ATM system outcome and the performances of all stakeholders.

Program SESAR 2020 Wave 1

Need for coordination Network
