

Solution PJ.03a-09 — Surface operations by RPAS

Surface operations by Remotely Piloted Aircraft Systems (RPAS) facilitate the operation of RPAS at airports and their integration into an environment which is dominated by manned aviation. To the maximum extent possible, RPAS will have to comply with the existing rules and regulations. The solution includes the particular requirements of remotely piloted operations, and will describe their specificities with respect to the manned operations, providing operational requirements for technological developments that could mitigate them.
