

Solution PJ.14-W2-60 — FCI Terrestrial Data Link and A-PNT enabler (L-DACS)

This Key R&D activity addresses the future terrestrial A/G and A/A data link solution, which is one of the ICAO technologies, and supports the increasing ATM performance requirements (due to the growth of air traffic and its complexity). L-DACS constitutes a potential component of the A-PNT to support positioning and navigation requirements in PBN/RNP operations in case of a GNSS degradation or outage.
