

Solution U2S-03 — Strategic de-confliction service

The service provides de-confliction assistance to a drone operator at strategic level (when the flight plan is submitted, it is compared to other known flight plans and a de-confliction in time or route could be proposed). This service could be mandatory or optional according to the operating environment.

The reference for this definition is the "European ATM Master Plan: Roadmap for the safe integration of drones into all classes of airspace". On-going Research activities on U-space may update this definition in future datasets.
