COM11.1		Voice over Internet Protocol (VoIP) in En-Route								
REG	ASP	MIL	APO	USE	INT	IND	NM	MET	AIS	USP

## Subject matter and scope

This Implementation Objective aims at an efficient use of voice over Internet Protocol (VoIP) by harmonised and coordinated implementation for ground/ground and ground part of ground/air aeronautical communications, ensuring network benefits from VoIP implementation.

The initiative covers inter centre (encompassing all type of ATM Units) voice communication and the links with the ground radio stations. COM11.1 is applicable to 'En-Route' and 'Network' Operating Environments. Inter-centre voice communications are currently mainly performed via analogue and digital circuits.

This legacy ATM voice services will soon no longer be supported by the European telecommunication service providers, making the use of new technology necessary. At present and in order to follow the evolution of the communication technologies, ATM-VoIP is the global standard (ICAO DOC 9896 ed2, based on EUROCAE ED137-B) for ground telephony and ground segment of the Air-Ground voice. ATM-VoIP industrial standard (EUROCAE ED-137) is maintained and evolved over time to ensure that voice communication requirements are met. Transition towards VoIP is bringing interoperability.

Cross-border aspects need to be addressed appropriately within the network perspective. VoIP in ATM constitutes an essential part of Network Strategy Plan SO 8 - Sub-project 2 - VoIP implementation.

This sub-project aims at an efficient use of Voice over Internet Protocol by harmonised and coordinated implementation for ground/ground and ground part of ground/air aeronautical communications, ensuring network benefits from VoIP implementation.

**NOTE:** COM11.1 is a successor of the former objective COM11. Its applicability date is related to the DP Family 3.1.4 in the context of supporting FRA, however the objective COM11.1 (and old COM11) goes beyond DP Family 3.1.4 (FRA) and plans harmonised VoIP implementation in the whole En-Route environment (without FL310 limitation). This is to be able to collect yearly progress reports from all implementations (DP related and None-DP related).

**NOTE FOR MILITARY AUTHORITIES:** It is the responsibility of each military authority to review this Objective IN ITS ENTIRETY and address each of the SLoAs that the military authority considers RELEVANT for itself. This has to be done on top and above of the review of "MIL" SLoAs which identify actions EXCLUSIVE to military authorities.

## Applicability Area(s) & Timescale(s)

<b>Applicability Area</b>	All ECAC+ States		
<b>Timescales:</b>	<b>From:</b>	<b>By:</b>	<b>Applicable to:</b>
Initial operational capability	01/01/2013		Applicability Area
Full operational capability		31/12/2021	Applicability Area

### Stakeholder Lines of Action (SLoAs)

SLoA ref.	Title	From	By
COM11.1-ASP01	Develop safety assessment for the changes	01/01/2012	31/12/2021
COM11.1-ASP03	Upgrade and put into service Voice Communication Systems to support VoIP inter-centre telephony	01/01/2013	31/12/2021
COM11.1-ASP04	Upgrade and put into service Voice Communication Systems to support VoIP links to the ground radio stations	01/01/2013	31/12/2021

Description of finalised and deleted SLoAs is available on the eATM Portal @ [https://www.eatmportal.eu/working/depl/essip\\_objectives](https://www.eatmportal.eu/working/depl/essip_objectives)

### Expected Performance Benefits

<b>Safety:</b>	Maintained or improved by providing enhanced signalisation functions. Improved by providing a more resilient infrastructure.
<b>Capacity:</b>	Maintained or improved by providing enhanced signalisation functions.
<b>Operational Efficiency:</b>	-
<b>Cost Efficiency:</b>	Reduced costs by enabling flexible and dynamic use of ANSP resources, leading to long term savings.
<b>Environment:</b>	-
<b>Security:</b>	-

### Detailed SLoA Descriptions

<b>COM11.1-ASP01</b>	<b>Develop safety assessment for the changes</b>	<b>From:</b> 01/01/2012	<b>By:</b> 31/12/2021
<b>Action by:</b>	<b>ANS Providers</b>		
<b>Description &amp; purpose:</b>	<p>Develop safety assessment of the changes, notably upgrades of voice communication systems to support VoIP both for inter-centre telephony and AG radio communication. The tasks to be done are as follows:</p> <ul style="list-style-type: none"> <li>- Conduct hazard identification, risk assessment in order to define safety objectives and safety requirements mitigating the risks;</li> <li>- Develop safety assessment;</li> <li>- Deliver safety assessment to the NSA, if new standards are applicable or if the severity class of identified risks is 1 or 2.</li> </ul> <p>This safety assessment shall be based on fully validated/recognised method.</p>		
<b>Supporting material(s):</b>	<p>EC - COMMISSION IMPLEMENTING REGULATION (EU) 2017/373 - (OJ L 62, 8.03.2017, p. 1) - COMMISSION IMPLEMENTING REGULATION (EU) 2017/373 of 1 March 2017 laying down common requirements for providers of air traffic management/air navigation services and other air traffic management network functions and their oversight, repealing Regulation (EC) No 482/2008, Implementing Regulations (EU) No 1034/2011, (EU) No 1035/2011 and (EU) 2016/1377 and amending Regulation (EU) No 677/2011 03/2017</p> <p>Url : <a href="https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32017R0373&amp;from=EN">https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32017R0373&amp;from=EN</a></p> <p>EUROCONTROL - EAM 4 - ESARR 4 - Risk Assessment and Mitigation in ATM - Edition 1.0 / 04/2001</p> <p>Url : <a href="https://www.eurocontrol.int/publication/esarr-4-risk-assessment-and-mitigation-atm">https://www.eurocontrol.int/publication/esarr-4-risk-assessment-and-mitigation-atm</a></p>		
<b>Finalisation criteria:</b>	1 - The Safety argument for all changes, generated by the deployment of VoIP, has been delivered by the ANSP to the NSA.		
<b>COM11.1-ASP03</b>	<b>Upgrade and put into service Voice Communication Systems to support VoIP inter-centre telephony</b>	<b>From:</b> 01/01/2013	<b>By:</b> 31/12/2021
<b>Action by:</b>	<b>ANS Providers</b>		

COM11.1	Voice over Internet Protocol (VoIP) in En-Route		
<b>Description &amp; purpose:</b>	<p>Upgrade and put into service voice communication systems which support ED-137 compliant VoIP inter-centre telephony which will enable the deployment of system enablers listed in -References- section. The tasks to be done are as follows:</p> <ul style="list-style-type: none"> <li>- Define requirements which fit with operational/technical context and are based on relevant standards;</li> <li>- Upgrade voice communication systems to comply with defined requirements;</li> <li>- Implement or purchase IP network services to enable international communication exchange on IPS based protocol;</li> <li>- Purchase and install VCS equipment and/or gateways able to support VoIP in ATM;</li> <li>- Implement the necessary IPv4/IPv6 translation device if required;</li> <li>- Test voice required connectivity and performance;</li> <li>- Update VoIP addressing and connectivity information in the EUROCONTROL AGVN web-database;</li> <li>- Integrate upgraded voice communication systems into the operational network;</li> <li>- Put into service upgraded voice communication systems.</li> </ul> <p>The upgraded voice communication systems and their HMI shall enable the operators to perform the inter-centre communication using VoIP telephony at all types of ATS units.</p> <p>Report yearly the actual achieved performance for implemented VoIP in ATM to the EUROCONTROL Agency.</p>		
	<p><b>Note :</b>Completion of the finalisation criteria should be reflected by updating the VoIP connectivity information in the EUROCONTROL AGVN web-database.</p>
