

	<h2 style="text-align: center;">SESAR Solution – Nil</h2>		
ENV03 Continuous Climb Operations (CCO)]			
Stakeholders	ANSPs Airport Operators Airspace Users	Expected Benefits	
FOC	Open (Local Objective)	OI Steps / Enablers	AOM-0703
Estimated achievement	Not Applicable	CP1 AF & SDP Family	- -
Status	Not Applicable	ICAO ASBU	APTA-B0/5, APTA-B1/5
Completion Evolution		Progress among non-Completed Airports	
Progress was good in 2021. Three additional Airports completed this Objective in 2021 for a total of 57 Airports .		The progress is in the low margins, due to the Airports that have not reported yet implementation plans.	
<h3 style="text-align: center;">Status of implementation</h3>			
<ul style="list-style-type: none"> • Two Airports report that high terrain is presenting an obstacle for CCO. • Several Airports report that they will implement CCO after an Airspace reorganisation. • Several Airports report that CCO will follow the implementation of the National Performance Navigation Plan. • One Airport reports that CCO applies where OPS conditions allow it. • Several Airports report that CCO implementation still depends on the acceptance of the CAA's Airspace Change Proposal.
