

# COM12 — New Pan-European Network Service (NewPENS)

[Download Progress Report](#)

PENS (Pan-European Network Service) is an international ground/ground communications infrastructure jointly implemented by EUROCONTROL and European ANSPs in order to meet existing and future ATM communication requirements.

NewPENS builds on PENS and aims at providing a new framework, with an adapted governance, to reap the benefits of having a single IP backbone for all ATM services in the ICAO EUR/NAT region.

The aim of NewPENS is to support information exchanges for all ATM services, not only for ANSPs and the Network Manager, but also supporting interactions with military, airport and aircraft operator. It is up to these stakeholders, depending on their requirements, to join NewPENS or use public Internet Protocol network

*NOTE FOR MILITARY AUTHORITIES: It is the responsibility of each military authority to review this Objective IN ITS ENTIRETY and address each of the SLoAs that the military authority considers RELEVANT for itself. This has to be done on top and above of the review of "MIL" SLoAs which identify actions EXCLUSIVE to military Authorities.*

## Expected Performance Benefits

<b>Safety</b>	-
<b>Capacity</b>	-
<b>Operational efficiency</b>	-
<b>Cost efficiency</b>	<p>Significant cost savings for the international communications of all connected stakeholders compared to:</p> <ul style="list-style-type: none"> <li>- Keeping the inter-stakeholder connections separate from the network.</li> <li>- Continuing to run all international communications on bilateral international links.</li> </ul>
<b>Environment</b>	-
<b>Security</b>	<p>NewPENS will further enhance security protection, detection and remediation capabilities with respect to PENS. It shall be compliant with the Security levels requested by the applications it will support. Security will be handled on multiple levels: technical, processes and people.</p>
