FCM07		Calculated Take-off Time (CTOT) to Target Times for ATFCM Purposes								
REG	ASP	MIL	APO	USE	INT	IND	NM	MET	AIS	USP

## Subject matter and scope

Target times (TT) shall be applied to selected flights for ATFCM purposes to manage ATFCM at the point of congestion rather than only at departure. Where available, the target times of arrival (TTA) shall be derived from the Airport Operations Plan (AOP). TTAs shall be used to support airport arrival sequencing processes in the en-route phase.

NM's systems shall be able to adjust CTOTs based on refined and agreed TTAs at the destination airport; TTAs shall be integrated into the AOP for subsequent refinement of the NOP.

Flight data processing systems may need to be adapted in order to process downlinked trajectory data (ADS-C EPP).

In a first step, NM system will transmit calculated target times (TT) at the most penalising regulation reference point in addition to calculated take-off times (CTOT) to all concerned users of CTOT. Those users should be able to manage this new feature and potential system upgrades should be foreseen

**NOTE:** This is an "Initial" objective to provide advance notice to stakeholders. Some aspects of the objective require further validation.

**NOTE FOR MILITARY AUTHORITIES:** It is the responsibility of each military authority to review this Objective IN ITS ENTIRETY and address each of the SLoAs that the military authority considers RELEVANT for itself. This has to be done on top and above of the review of "MIL" SLoAs which identify actions EXCLUSIVE to military authorities.

## Applicability Area(s) & Timescale(s)

Applicability Area	From:	By:	Applicable to:

**Expected Performance Benefits**

<b>Safety:</b>	-
<b>Capacity:</b>	The involvement in TT generation of local actors has a positive impact on capacity and delay reduction.
<b>Operational Efficiency:</b>	Reduced flight time in TMA leading to an optimised flight arrival management in the TMA. Reduction of holdings along with radar vectoring, with positive impact on fuel burn.
<b>Cost Efficiency:</b>	-
<b>Environment:</b>	-
<b>Security:</b>	-

<b>Action by:</b>	<b>NM</b>		
<b>Description &amp; purpose:</b>	From March 2016, NM started to provide the Target Times related to the most penalised regulation as part of the Slot Allocation Message (SAM). This message is sent at the earliest 2 hours before the last received EOBT (Estimated Off-Block Time), together with CTOT (Calculated Take-Off Times). The message is sent to ATSU's concerned by the flight and to the airline's Flight Operations Center.
