

ITY-FMTP — Common Flight Message Transfer Protocol (FMTP)

[Download Progress Report](#)

This SES-related implementation objective is derived from Regulation (EC) No 633/2007 of 7 June 2007 laying down requirements for the application of a flight message transfer protocol (FMTP) for information exchanges between flight data processing systems for the purpose of notification, coordination and transfer of flights between air traffic control units and for the purposes of civil-military coordination, in accordance with Regulation (EC) No 1032/2006 [Ref. Article 1(1)].

Regulation (EC) No 633/2007 applies to [Ref. Article 1(2)]:

- a) Communication systems supporting the coordination procedures between air traffic control units using a peer-to-peer communication mechanism and providing services to general air traffic;
- b) Communication systems supporting the coordination procedures between air traffic services units and controlling military units, using a peer-to-peer communication mechanism and providing services to general air traffic.

The terms used in this objective are defined in Article 2 of Regulation (EC) No 549/2004, complemented by Article 2 of Regulation (EC) No 633/2007.

This implementation objective has been amended in order to introduce the new optional conditional transitional arrangements defined in Regulation (EU) No 283/2011 of 22 March 2011.

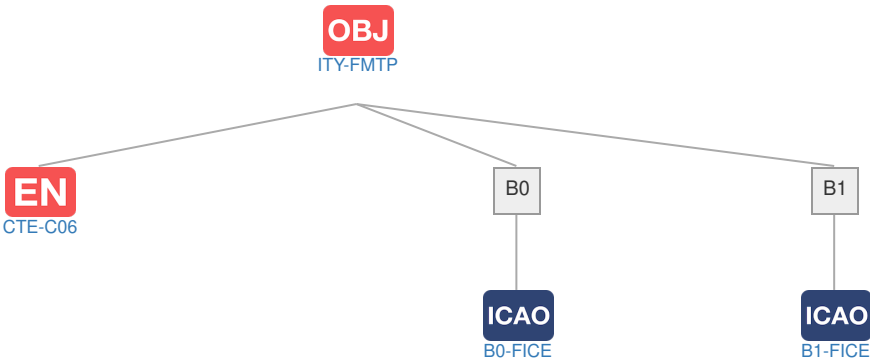

NOTE: This SES-related implementation objective does not replace the EC legislation. It aims at facilitating the monitoring and reporting of the implementation of a common flight message transfer protocol in European ATM in line with the EC regulations and through the SES implementation monitoring and reporting mechanism.

NOTE FOR MILITARY AUTHORITIES: It is the responsibility of each military authority to review this Objective IN ITS ENTIRETY and address each of the SLoAs that the military authority considers RELEVANT for itself. This has to be done on top and above of the review of "MIL" SLoAs which identify actions EXCLUSIVE to military authorities.

Edition	2022
Stakeholders	Air Navigation Service Provider / Military
Type	SES
Scope	ECAC+
Status	Active

Context

Related Elements

Applicability Area(s) and Timescales

Applicability Area: All ECAC+ States

Timescales	From	By	Applicable to
Entry into force of regulation	28-06-2007	-	Applicability Area
All EATMN systems put into service after 01/01/09	01-01-2009	-	Applicability Area
All EATMN systems in operation by 20/04/11	-	20-04-2011	Applicability Area
Transitional arrangements	-	31-12-2012	Applicability Area
Transitional arrangements when bilaterally agreed between ANSPs	-	31-12-2014	Applicability Area

Airport
Terminal Airspace
En-Route
Network

Expected Performance Benefits

Safety	-
Capacity	-
Operational efficiency	-
Cost efficiency	More cost efficient as X.25 maintenance costs are increasing while TCP/IP costs are lower.
Environment	-
Security	-
