

AOM20 — Implement ATS Route Network (ARN) - Version 7

Implement ATS Route Network Version 7 (ARN V7) as a response to the Airspace Action Plan and the 2015 Airspace Concept and Strategy for the ECAC States.

Develop, validate and implement ARN V7 in accordance with Advanced Airspace Scheme (AAS) principles taking into account military requirements.

The objective will ensure the progressive deployment of the AAS route network and consolidate into a network approach the first FAB developments, Free Route Airspace (FRA) implementation, and Terminal Airspace System (TAS) developments.

The progressive implementation of ARN V7 will ensure the delivery of the airspace structure elements of SESAR Deployment Baseline.

Edition	2022
Stakeholders	Air Navigation Service Provider / Military / Airspace Users / International Organisations and Regional Bodies
Type	SESAR
Scope	ECAC
Status	Achieved

Context

Related Elements

Applicability Area(s) and Timescales

Applicability Area: All ECAC States

Timescales	From	By	Applicable to
Initial operational capability	01-05-2011	-	Applicability Area
Full operational capability	-	31-10-2013	Applicability Area

Operating Environments

En-Route

Network

Expected Performance Benefits

Safety	Some enhancement through reduction in controller workload.
Capacity	Increased through reduction in conflict points, and specialization of routes and sectors to enhance productivity and reduce controller workload.
Operational efficiency	-
Cost efficiency	Savings in route distances in some States as well as better fuel efficiency through increased use of preferred flight profiles and improved sectorisation.
Environment	Reductions in emissions through use of more optimal routes.
Security	N/A

Stakeholder Lines of Action
