Subject matter and scope

This SES-related implementation objective is derived from Regulation (EU) No 1207/2011 (as amended), laying down requirements on the systems contributing to the provision of surveillance data, their constituents and associated procedures in order to ensure the harmonisation of performance, the interoperability and the efficiency of these systems within the European air traffic management network (EATMN) and for the purpose of civil- military coordination (SPI-IR).

Regulation (EU) No 1207/2011 (as amended) applies to the surveillance chain (as defined in Article 3(6) of the Regulation) constituted of:

- (a) airborne surveillance systems, their constituents and associated procedures;
- (b) ground-based surveillance systems, their constituents and associated procedures;
- (c) surveillance data processing systems, their constituents and associated procedures;
- (d) ground-to-ground communications systems used for distribution of surveillance data, their constituents and associated procedures.

Regulation (EU) No 1207/2011 (as amended) applies to all flights operating as general air traffic in accordance with instrument flight rules within the airspace provided for in Article 1(3) of Regulation (EC) No 551/2004 with the exception of Articles 7(3) and 7(4) which apply to all flights operating as general air traffic. This Regulation applies to air traffic service providers which provide air traffic control services based on surveillance data, and to communication, navigation or surveillance service providers which operate systems laid down in paragraph 1 of the Regulation itself.

Regulation (EU) No 1207/2011 (as amended) should be read in conjunction with the existing locally published requirements that European States already have in force on the subject matter.

The timescales identified in the objective as well as the possible exemptions reflect the amendments published through the Commission Implementing Regulation (EU) No 2020/587 published in April 2020.

NOTE FOR MILITARY AUTHORITIES: It is the responsibility of each military authority to review this Objective IN ITS ENTIRETY and address each of the SLoAs that the military authority considers RELEVANT for itself. This has to be done on top and above of the review of "MIL" SLoAs which identify actions EXCLUSIVE to military authorities.

Applicability Area(s) & Timescale(s)

| Applicability Area | From: | By: | Applicable to: |
|--|------------|------------|--------------------|
| Entry into force of regulation | 13/12/2011 | | Applicability Area |
| ATS unit operational capability | | 12/12/2013 | Applicability Area |
| EHS and ADS-B Out in transport-type State aircraft | | 07/12/2020 | Applicability Area |
| ELS in transport-type State aircraft | | 07/12/2020 | Applicability Area |
| Ensure training of MIL personnel | | 07/12/2020 | Applicability Area |
| Retrofit aircraft capability | | 07/12/2020 | Applicability Area |

Description of finalised and deleted SLoAs is available on the eATM Portal @ https://www.eatmportal.eu/working/depl/essip_objectives

Expected Performance Benefits

| | |
|--------------------------------|---|
| Safety: | Improved safety through the deployment of surveillance solutions in non-radar areas. |
| Capacity: | Capacity increase through the deployment of surveillance solutions in areas where currently procedural separation is applied. |
| Operational Efficiency: | The application of surveillance based separation instead of procedural separation will allow the airspace users to fly more efficient trajectories. |
| Cost Efficiency: | - |
| Environment: | - |
| Security: | - |

| Action by: | National Supervisory Authorities (NSAs) | | |

| | | | |
|----------------|--|--|--|
| ITY-SPI | Surveillance Performance and Interoperability | | |
|----------------|--|--|--|

| | | | |
|-----------------------------------|--|-------------------|--------------------------|
| Description & purpose: | Verify that the necessary safety assessments for the existing surveillance chain (systems identified in Art. 2.1 (b), (c) and (d) of Regulation (EU) No 1207/2011 (SPI-IR)), as required by Art 9.1 of the Regulation are conducted by the parties concerned and review, as appropriate, the safety assessment report(s) before their acceptance. | | |
| | Note : 'existing' refers to systems in place at the date of entry into force of Regulation (EU) 1207/2011 | | |
| Supporting material(s): | EC - COMMISSION IMPLEMENTING REGULATION (EU) 2017/373 - (OJ L 62, 8.03.2017, p. 1) - COMMISSION IMPLEMENTING REGULATION (EU) 2017/373 of 1 March 2017 laying down common requirements for providers of air traffic management/air navigation services and other air traffic management network functions and their oversight, repealing Regulation (EC) No 482/2008, Implementing Regulations (EU) No 1034/2011, (EU) No 1035/2011 and (EU) 2016/1377 and amending Regulation (EU) No 677/2011 10/2011 Url : https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32017R0373&from=EN | | |
| Finalisation criteria: | 1 - Safety assessment to existing surveillance chain (see SLoA description) has been conducted by the ANSP and delivered to the NSA. The NSA has reviewed the safety assessment as appropriate and the outcome of the assessment has been communicated to the ANSP. | | |
| ITY-SPI-ASP01 | Ensure interoperability of surveillance data | From: - | By: 12/12/2013 |
| Action by: | ANS Providers | | |
| Description & purpose: | As required by Article 5(1) of the Regulation (EU) No 1207/2011 (SPI-IR) , air navigation service providers shall ensure interoperability of all surveillance data transferred from their ground-based surveillance systems and their surveillance data processing systems to other navigation service providers are subject to a common protocol. | | |
| | Note :The ASTERIX Standard has been transposed into a EUROCONTROL Specification which may be considered for recognition as Community Specification by the European Commission. | | |
| Supporting material(s): | EUROCONTROL - SPEC 147 - EUROCONTROL Specification for ATM Surveillance System Performance (ESASSP) - Volumes 1 and 2 - Edition 1.1 / 09/2015 Url : https://www.eurocontrol.int/publication/eurocontrol-specification-atm-surveillance-system-performance-esassp EUROCONTROL - SPEC-149 - EUROCONTROL Specification for Surveillance Data Exchange - Part 1 All Purpose Structured EUROCONTROL Surveillance Information Exchange (ASTERIX) - Edition 2.4 / 10/2016 Url : https://www.eurocontrol.int/asterix | | |
| Finalisation criteria: | 1 - All surveillance data transferred from their ground-based surveillance systems and their surveillance data processing systems to other navigation service providers: a) are subject to a data format that is agreed between the parties concerned; b) allow identification of the data source and identification of the type of data; c) are time stamped and expressed as coordinated universal time (UTC). | | |
| ITY-SPI-ASP02 | Conduct Safety Assessment for the existing surveillance chain | From: - | By: 05/02/2015 |
| Action by: | ANS Providers | | |
| Description & purpose: | Conduct a safety assessment: for all existing ground-based surveillance systems, surveillance data processing systems and ground-to-ground communications systems used for the distribution and processing of surveillance data, as required in Art. 9.1 and Annex VI of SPI-IR. | | |
| | Note : 'existing' refers to systems in place at the date of entry into force of Regulation (EU) 1207/2011 | | |
| Derogations: | The SLoA does not apply to ANSP which do not use or do not provide surveillance data. | | |
