COM13		Air Traffic Services (ATS) datalink using SatCom Class B								
REG	ASP	MIL	APO	USE	INT	IND	NM	MET	AIS	USP

Subject matter and scope

Communication services in terms of datalink systems and services are required in support of i4D and Aeronautical information data sharing.

The Iris Precursor service establishes the necessary communication infrastructure to support interoperable Oceanic and Continental i4D operations. The Iris Precursor service deploys an aviation communications service based on the existing Inmarsat SwiftBroadband (SBB) service. This would augment existing VHF Datalink (VDL) capability in Europe to improve current Link2000+ and planned I4D ATS datalink services delivery through increased reliability and capacity, and help establish satellite communications as a key component in the future ATM communications landscape.

NOTE FOR MILITARY AUTHORITIES: It is the responsibility of each military authority to review this Objective IN ITS ENTIRETY and address each of the SLoAs that the military authority considers RELEVANT for itself. This has to be done on top and above of the review of "MIL" SLoAs which identify actions EXCLUSIVE to military authorities.

Detailed SLoA Descriptions

COM13-REG01	Approve compliance with safety requirements	From: -	By: -
Action by:	Regulatory Authorities		
Description & purpose:	Regulatory Authorities need to ensure that the safety requirements are implemented in line with the safety assessment performed.

COM13	Air Traffic Services (ATS) datalink using SatCom Class B		
ATM Master Plan relationship:	[CTE-C02f]-Future Satcom for ATM: SATCOM Class B in Multilink		
Finalisation criteria:	1 - The SATCOM system is installed and operational.		
COM13-ASP02	Safety Assessment	From:	By:
		-	-
Action by:	ANS Providers		
Description & purpose:	A safety assessment of the changes shall be developed in coordination and synchronization with all concerned stakeholders. This safety assessment shall be delivered to the competent authority.

Finalisation criteria:	1 - Safety assessment developed and delivered to the competent authority.		
COM13-USE01	Upgrade Aircraft avionics	From:	By:
		-	-
Action by:	Airspace Users		
Description & purpose:	Upgrade the aircraft avionics with Satellite A-G datalink in multilink or in a standalone environment, based on existing recent commercial SATCOM systems (e.g. Inmarsat SBB). This allows augmentation of the terrestrial VDL2 network capability for increased datalink capacity and availability in continental airspace, and also the capability to extend support for i4D operations in oceanic areas (where the terrestrial VDL capability is not available).

ATM Master Plan relationship:	[A/C-33a]-Class B SATCOM		
Finalisation criteria:	1 - Aircraft avionics upgraded.
