

<b>Deployment Scenario Title</b>	<b>Virtual centre concept</b>
<b>Deployment Scenario Description</b>	Virtual-centre concept: work station, service interface definition and virtual-centre concepts will provide an operating environment in which different ATS units, across different ANSPs, will appear as a single unit and will be subject to operational and technical interoperability. This will include development of the ATSU architecture, taking a service-oriented approach, with a focus on technical services and common interfaces.
<b>Essential Operational Change</b>	Virtualisation of Service Provision
<b>Maturity</b>	In development phase: Key Solutions Approaching Maturity

Applicable Operating Environment			
Airport	Terminal Airspace	En-Route	Network

Timeline
