

# eATM Portal – March 2020 Update (v3.01)

An updated version (v3.01) of the eATM Portal has been published. This release note lists the changes that have been introduced.

The main changes introduced in this version are:

- To correct a number of small issues and bugs related to the December 2019 release incorporating the European ATM Master Plan 2020 Edition and an improved navigation menu
- Updated Overall Implementation Progress summary in the Executive Overview

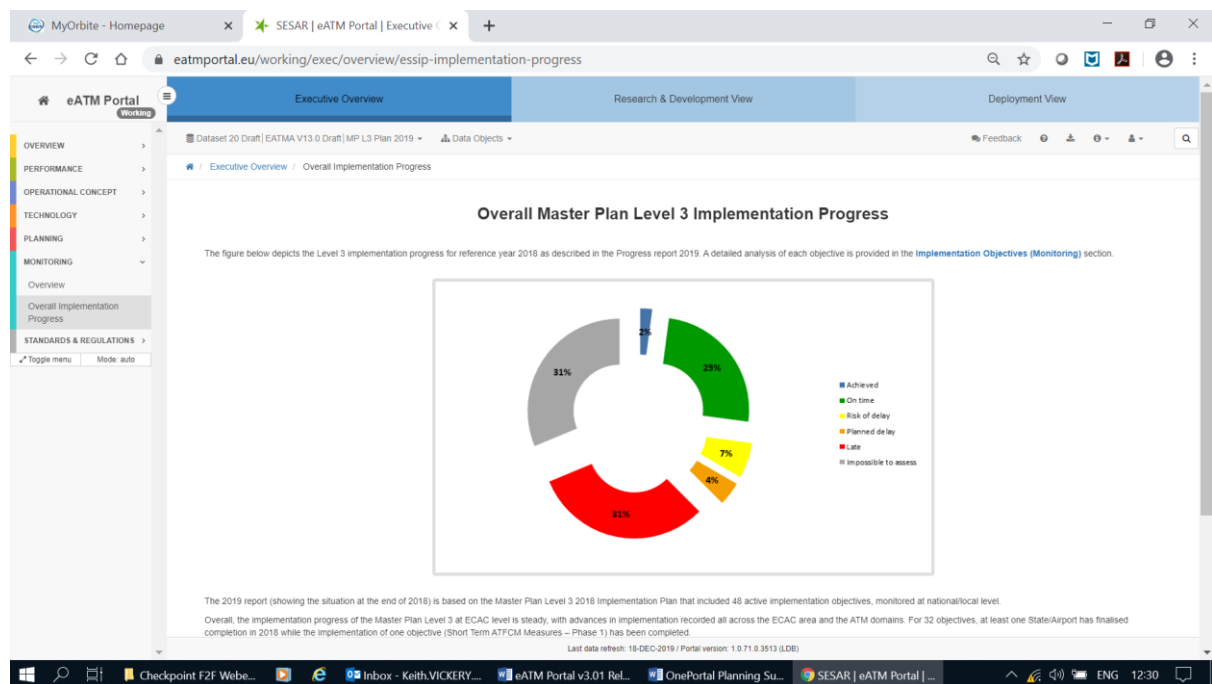

## New Features

None added in this release

## Changed Features

- **Overall Implementation Progress**

The Overall Implementation Progress screen in Executive Overview has been updated to reflect the Master Plan Level 3 Implementation Monitoring status data presented in the 2019 report.

## Bug Fixes

A number of issues have been corrected. These include the following:

- **Master Plan Update 2020 Issues**

These cover correcting:

- error messages displayed when attempting to view PCP related Deployment Scenarios in the Annex A view;
- format issues with Executive Overview timeline bar colour coding and tooltip pop ups and suppressing display of Deployment Scenarios in datasets prior to Master Plan Update 2020;
- a number of inconsistencies between the published Master Plan Update 2020 document and the data presented in the Annex A, Stakeholder Roadmap and EOC views;
- an error when attempting to view the System Architecture Overview page;
- a text code appearing the Solutions Excel export file;

- **Enhanced Navigation**

When viewing the Data Relationship Diagrams on a Data Element List page, the hide operation of the left hand menu became frozen – this has been fixed.

### ***Preview of the next Portal version release:***

A further Portal release is planned during the April-June 2020 period, which will include inter alia:

- Further filter and grouping features for the new Level 1 Executive Views;
